SUMMARY

Software Engineer with 4+ years designing and building APIs, microservices, and cloud infrastructure on AWS and GCP. Developed services in Java, Python, and Go that improved system throughput and data consistency. Automated CI/CD pipelines, accelerating release cycles by nearly one-third. Maintained secure, high-availability systems supporting hundreds of users daily.

SKILLS

- Java, Python, JavaScript, Typescript, Go
- MongoDB, MySQL, PostgreSQL
- Spring Boot, FastAPI, Django, Flask, Node.js, Express
- Jenkins, GitHub Actions, Jira, Git
- Selenium, Robot Framework, PyTest
- AWS, GCP, Docker, Kubernetes, Terraform

PROFESSIONAL EXPERIENCE

Software Engineer (Backend)

Jan 2025 – Aug 2025 | Remote, Canada

Freelance

- Engineered scalable backend APIs using FastAPI and PostgreSQL for a construction management SaaS platform, supporting real-time operations.
- Improved backend test coverage by 35% and reduced API latency by 40% through query and schema optimization.
- Designed and implemented secure authentication and authorization mechanisms, ensuring data integrity and compliance with industry standards.
- Automated CI/CD workflows with Jenkins and GitHub Actions, accelerating deployments and minimizing downtime.

Product Test Automation Engineer, Co-op

May 2023 – Dec 2023 | Vancouver, Canada

Hewlett - Packard (HP)

- Automated regression and performance tests using Selenium, Jenkins, and JMeter, reducing bugs by 30% and test duration by 45%.
- Implemented reusable test modules to reduce onboarding time for new QA engineers by 20%.
- Coordinated global QA teams to design test plans, identify edge cases, and mitigate quality risks.
- Managed bug tracking and release cycles efficiently with Jira, improving issue resolution speed.

System Engineer

Oct 2019 – Aug 2022 | Bangalore, India

IBM

- Spearheaded the development of SAP security dashboards using React, Node.js, and Oracle SQL, improving compliance monitoring accuracy by 25%.
- Built RESTful APIs for retrieving SAP GRC (Governance, Risk, and Compliance), reducing data retrieval time by 20%.
- Led a team of 3 engineers to automate SAP security checks using Python, cutting manual workload by 35% and decreasing security incidents by 40%.
- Collaborated with SAP and business teams to enhance access controls and audit processes.

EDUCATION

Simon Fraser University

2022 – 2024 | Burnaby, Canada

Master of Science in Computer Science

- Relevant Courses: Distributed Systems, Cloud Computing, Applied Cryptography

Nitte Meenakshi Institute of Technology

2015 – 2019 | Bangalore, India

Bachelor's in Computer Science

PROJECTS

Lox Programming Language Interpreter

Jun 2025

- Created a comprehensive interpreter supporting advanced language constructs and real-time execution through RESTful APIs.
- Streamlined continuous integration and deployment using GitHub Actions, improving release reliability and deployment speed.

Notion-Like AI Clone

Feb 2025

- Created a Notion-style app supporting multiple page creation, reducing document sync conflicts by 25%.
- Integrated Ollama LLM for AI-driven text autocompletion and DALL-E for image generation, accelerating user productivity by approximately 20%.

Encrypted Secure FileSystem [↗](#)

Apr 2024

- Engineered a secure file system with user-specific encryption keys and multi-user access control, reducing unauthorized access by 30%.
- Implemented CLI tools for encrypted file operations, improving storage efficiency by 25% and strengthening user data security.

YOLO V7 Microservices on AWS: Lambda vs ECS [↗](#)

Apr 2023

- Deployed PyTorch pre-trained YOLO V7 on AWS, utilizing both serverless and serverful for scalable application access.
- Managed EC2 and ECS with ALB auto-scaling for serverful solutions, and integrated serverless access through Lambda and API Gateway for efficiency.

CERTIFICATES

- AWS Certified Solutions Architect Associate [↗](#)
- Meta Back-End Developer Certificate [↗](#)
