SUMMARY

Software Engineer with 5+ years of experience building end-to-end web applications, from responsive frontend interfaces to scalable backend systems and cloud infrastructure. Proficient in React, Next.js, Go, Python, and Node.js, with expertise in designing APIs, improving system performance, and deploying applications on AWS and GCP. Proven ability to enhance user experience while ensuring backend reliability and scalability.

SKILLS

- Python, C++, Go, Java, TypeScript, JavaScript
- PostgreSQL, MySQL, MongoDB
- AWS, GCP, Docker, Kubernetes, Terraform
- React, Next.js, Angular, Redux, HTML5, CSS3
- Node.js, Express, FastAPI, Django, Spring Boot
- Jenkins, GitHub Actions, Jira, Git

PROFESSIONAL EXPERIENCE

Software Engineer II

Oct 2025 – Present | Bangalore, India

NetApp

- Expanded **CI/CD testing (CIT)** coverage for ONTAP Deploy, improving cluster provisioning reliability by **~30%**.
- Enhanced **C++ infrastructure utilities** within the **MHost core subsystem**, reducing regression failures by **~25%**.
- Improved deployment security and configuration management by integrating **GitLeaks** secret scanning into **CI pipelines**, reducing potential credential exposure.
- Investigated **cluster performance bottlenecks** in ONTAP environments, improving deployment stability by **15%**.

Software Engineer | Full-Stack

Jan 2025 – Sep 2025 | Remote, Canada

Freelance

- Built end-to-end web application features using **React, Next.js, FastAPI, and PostgreSQL**, supporting real-time operations for a SaaS platform.
- Improved frontend responsiveness by **25%** and increased user engagement by **15%** through optimized UI components.
- Reduced backend API latency by **~40%** via query optimization and efficient data modeling.
- Designed and implemented **CI/CD pipelines (Jenkins, GitHub Actions)**, accelerating deployments and minimizing downtime.

Product Test Automation Engineer, Co-op

May 2023 – Dec 2023 | Vancouver, Canada

Hewlett - Packard (HP)

- Automated regression and performance testing (**Selenium, Jenkins, JMeter**), reducing critical bugs in production releases by **30%**.
- Implemented reusable test modules to reduce onboarding time for new QA engineers by **20%**.
- Coordinated with global QA teams to design test plans, identify edge cases, and mitigate quality risks.
- Managed issue tracking and release validation using **Jira**, improving resolution turnaround for high-priority defects.

System Engineer

Oct 2019 – Aug 2022 | Bangalore, India

IBM

- Spearheaded the development of **SAP security dashboards** using **React, Node.js, and Oracle SQL**, improving compliance monitoring accuracy by **25%**.
- Built **REST APIs** for retrieving **SAP GRC** (Governance, Risk, and Compliance), reducing data retrieval time by **20%**.
- Led a team of 3 engineers to automate **SAP security checks** using **Python**, reducing manual effort by **~35%**, resulting in a decrease in security incidents.
- Collaborated with **SAP** and business teams to enhance access controls and audit processes.

EDUCATION

Simon Fraser University

2022 – 2024 | Burnaby, Canada

Master of Science in Computer Science

Nitte Meenakshi Institute of Technology

2015 – 2019 | Bangalore, India

Bachelor's in Computer Science

CERTIFICATES

- AWS Certified Solutions Architect Associate 📄
- Meta Back-End Developer Certificate 📄

PROJECTS

Lox Programming Language Interpreter [↗](#)

Jun 2025

- Developed a comprehensive interpreter supporting advanced language constructs and real-time execution through RESTful APIs.
- Streamlined CI/CD deployments using GitHub Actions, enhancing release reliability.

Notion-Like AI Clone [↗](#)

Feb 2025

- Constructed a full-stack collaborative note-taking app with React and Next.js frontend and Node.js backend, reducing document sync conflicts by 25%.
- Integrated Ollama LLM for AI-driven text autocompletion and DALL-E for image generation, accelerating user productivity by approximately 20%.

Encrypted Secure FileSystem [↗](#)

Apr 2024

- Engineered a secure file system with user-specific encryption keys and multi-user access control, reducing unauthorized access by 30%.
- Implemented CLI tools for encrypted file operations, improving storage efficiency by 25% and strengthening user data security.

YOLO V7 Microservices on AWS: Lambda vs ECS [↗](#)

Apr 2023

- Deployed PyTorch pre-trained YOLO V7 on AWS, utilizing both serverless and serverful for scalable application access.
- Managed EC2 and ECS with ALB auto-scaling for serverful solutions, and integrated serverless access through Lambda and API Gateway for efficiency.
